Author Index

Berg, M.	A model for rubber springs in the dynamic analysis of rail vehicles	95–108
Beynon, J. H.	The effect of strain hardening on shakedown limits of a pearlitic rail steel	131–140
Bhaskar, A.	Wheel–rail dynamics with closely conformal contact. Part 1: dynamic modelling and stability analysis	11–26
Bhaskar, A.	Wheel–rail dynamics with closely conformal contact. Part 2: forced response, results and conclusions	27–40
Bracciali, A.	Calibration of an on-board noise measuring device by simultaneous measurements of trackside noise of three different wheelsets for the ETR500 FS train	41–49
Bracciali, A.	Detection of corrugation and wheelflat of railway wheels using energy and cepstrum analysis of rail acceleration	109–116
Brennan, M. J.	Active vibration control of a railway pantograph	117–130
Cascini, G.	Detection of corrugation and wheelflat of railway wheels using energy and cepstrum analysis of rail acceleration	109–116
Chow, W. K.	Study on passenger train vehicle fires	87–94
Ciuffi, L.	Calibration of an on-board noise measuring device by simultaneous measurements of trackside noise of three different wheelsets for the ETR500 FS train	41–49
Ciuffi, R.	Calibration of an on-board noise measuring device by simultaneous measurements of trackside noise of three different wheelsets for the ETR500 FS train	41–49
Evans, A. W.	A statistical analysis of fatal collisions and derailments of passenger trains on British Railways: 1967–1996	73–86
Fenander, A.	Frequency dependent stiffness and damping of railpads	51–62
Hardy, D. J.	Can railways compete with roads?	1–10
Johnson, K. L.	Wheel–rail dynamics with closely conformal contact. Part 1: dynamic modelling and stability analysis	11–26
Johnson, K. L.	Wheel–rail dynamics with closely conformal contact. Part 2: forced response, results and conclusions	27–40
Jones, C. P.	The effect of strain hardening on shakedown limits of a pearlitic rail steel	131–140
Kapoor, A.	The effect of strain hardening on shakedown limits of a pearlitic rail steel	131–140
Kennedy, A.	Risk management and assessment for rolling stock safety cases	67–72
Murtaza, M. A.	Railway managers—creative styles	63–66
Tyfour, W. R.	The effect of strain hardening on shakedown limits of a pearlitic rail steel	131–140
Wood, G. D.	Wheel–rail dynamics with closely conformal contact. Part 1: dynamic modelling and stability analysis	11–26
Woodhouse, J.	Wheel–rail dynamics with closely conformal contact. Part 1: dynamic modelling and stability analysis	11–26
Woodhouse, J.	Wheel–rail dynamics with closely conformal contact. Part 2: forced response, results and conclusions	27–40
Wu, T. X.	Active vibration control of a railway pantograph	117–130
